

# ASWI-PS

Universal Steering Wheel Control Interface

For Pioneer and Sony Radios with wired remote inputs.

### Installation Instructions

#### Before You Start

#### A. Is this product compatible with the vehicle?

See application guide (seperate sheet) for listing of vehicles and connection information. If not, check www.pacaudio.com for an updated list of compatible vehicles.

#### B. Prepare for the installation.

- If possible, install the SWI-PS while you are installing the new head unit. Keep in mind you may need to plug in the factory stereo to locate certain wires; therefore do not complete the head unit installation until the SWI-PS is working properly.
- Plan a general installation location for both the SWI-PS plug and the control body. Keep in mind that the supplied wire harness is two feet long, and the 1/8" plug harness is three feet long.
- · Use a multimeter or approved measuring device for checking vehicle circuits.

#### Wiring Connections

Note: Only 3 wires will be used during installation. Only GM vehicles programmed for version #4, will use 4 wires.

Step 1. Connect the BLACK wire to ground (-).

Verification: Wire or location registers a constant (-) when probed.

#### Step 2.

Connect the RED wire to switched +12V.

**Verification:** Wire registers +12V when the ignition key is turned to the ACC or ON positions.

#### Step 3.

Connect the appropriate interface wire (WHITE, YELLOW, ORANGE or GREEN).

- Refer to the **Identification and Connection Chart**. Locate the vehicle and note the SWC wire color in the "Interface Wire Color" column.
- Note the vehicle wire color and location information in the "Identification" column.

**Note:** You will only connect ONE of these wires. The other 3 wires will not be used. Cut and insulate the unused wires.

· Connect the wire as indicated in the chart.

Step 4

If necessary, perform the following operations as indicated by the notes in Identification and Connection Chart.

Note: **Step 4a** is for vehicles made by General Motors that are programmed for version #4 only. If no connections is necessary, proceed to Step 4b.

#### Step 4a.

Connect the BLUE serial data wire.
Connect this wire ONLY on GM passenger vehicles (no trucks or SUVs) with airbags AND steering wheel heater controls. For all other vehicles, cut and insulate the BLUE wire.

#### Step 4b.

If instructed by the Vehicle Application Guide, cut the BROWN wire loop and insulate both halves.

#### Step 4c.

If instructed by the Vehicle Application Guide, cut the VIOLET wire loop and insulate both halves, or place a resistor in-line of wires.

#### Programming the SWI-PS to Work With the Vehicle

#### Step 5.

Refer to **The Vehicle Appication Guide**. Note the **INTERFACE Version Number** next to the selected vehicle. Fill in the information below for quick reference.

Version Number:

(Write Version Number here)

#### Step 6.

Press and hold programming/ mode button on SWI-PS. Turn the vehicle ignition to the ON position.

The LED on the SWI-PS will light.

#### Step 7.

Release the programming/ mode button.

The LED will turn off, indicating memory is cleared.

#### Step 8.

Press and release the programming/mode button the same number of times as the desired version number.

The LED will flash each time the button is pressed and released.

#### Step 9.

After 3 seconds, the LED will flash the same amount of times of set version number.

#### Step 10.

Turn vehicle ignition to OFF position. Vehicle programming sequence is complete.

#### Programming the SWI-PS to Control the Head Unit

IMPORTANT! Some steps of the programming instructions must be completed within a certain number of seconds following the previous step. Review the complete instruction before beginning the programming sequence.

#### Step 11.

Turn the vehicle ignition to the ON position.

LED will flash to indicate set version number.

If you programmed the interface for version #4, proceed with the following steps. If you did not program the interface for version #4, skip to Step 18.

#### Step 12.

Press and hold programming/ mode button on SWI-PS.

LED will light.

Step 13.
Release
programming/
mode button.

#### Step 14.

Press and hold the TEMP UP button on the steering wheel control.

LED will turn off.

#### Step 15.

Release the TEMP UP button.

LED will turn on. The function is programmed.

#### Step 16.

Repeat Steps 14 and 15, using the TEMP DOWN Button.

#### Step 17a.

If the vehicle is equipped with FAN UP and FAN DOWN buttons:

Repeat Steps 14 and 15 for these buttons as well.

#### Step 17b.

If the vehicle is NOT equipped with FAN UP and FAN DOWN buttons:

Press and release the programming/ mode button on the SWI-PS.

In either case, the LED will flash once and stay on. Skip to Step 20. You have 7 seconds to perform the next step.

# Step 18. Press and hold program

hold programming/mode button on SWI-PS.

LED will light.

Step 19.
Release programming/mode button.

You only need to press the programming/mode button once to program all the buttons. If you press this button again after the interface is programmed, it will erase all previous learned buttons.

#### Programming the SWI-PS to Control the Head Unit

IMPORTANT! Some steps of the programming instructions must be completed within a certain number of seconds following the previous step. Review the complete instruction before beginning the programming sequence.

#### Step 11.

Turn the vehicle ignition to the ON position.

LED will flash to indicate set version number.

If you programmed the interface for version #4, proceed with the following steps. If you did not program the interface for version #4, skip to Step 18.

#### Step 12.

Press and hold programming/ mode button on SWI-PS.

LED will light.

Step 13. Release programming/ mode button.

#### Step 14.

Press and hold the TEMP UP button on the steering wheel control.

LED will turn off.

#### Step 15.

Release the TEMP UP button.

LED will turn on. The function is programmed.

#### Step 16.

Repeat Steps 14 and 15, using the TEMP DOWN Button.

#### Step 17a.

If the vehicle is equipped with FAN UP and FAN DOWN buttons:

Repeat Steps 14 and 15 for these buttons as well.

#### Step 17b.

If the vehicle is NOT equipped with FAN UP and FAN DOWN buttons:

Press and release the programming/ mode button on the SWI-PS.

In either case, the LED will flash once and stay on. Skip to Step 20. You have 7 seconds to perform the next step.

#### Step 18. Press and hold programming/mode

button on SWI-PS.

Step 19. Release programming/ mode button.

You only need to press the programming/mode button once to program all the buttons. If you press this button again after the interface is programmed, it will erase all previous learned buttons.

#### Testing the SWI-PS

Note: For Sony head units, please refer to the note below.

Test each Heater function of the steering wheel controls. The TEMP and FAN should work properly. When testing the audio controls, the left LED on the SWI-PS will flash indicating it is sending a command. If any function does not work, repeat the programming instructions (starting from Step 11) or refer to **Troubleshooting Guide**.

Sony Head Units only!: If the Volume and Track/ Seek settings are reversed, you need to program the head unit to reverse the input. Please refer to the radio's Owners Manual to change this feature for the wired remote.

### Appendix A: Known Incompatible Vehicles

Vehicle		
Make(s)	Year(s) Model(s)	
ВМW	All with factory-activated cellular phones All with 5-volt SWC data wire at the steering colum	
	2002-2003	5-Series w/navigation
Mercedes-Benz	All	All vehicles
Toyota	All-2003	Sienna
Volkswagen	2002-up	All vehicles

#### Troubleshooting Guide

No power / won't go into programming mode:

- Check Red wire connection and fuse. Make sure INTERFACE is connected to switched +12volts, not constant +12volts.
- · Make sure vehicle ignition is on.

The INTERFACE controls the stereo immediately without pressing any buttons on the steering wheel:

- During programming, press the buttons on the steering wheel firmly until the left LED turns off. Releasing the button too early will cause the INTERFACE to send out a signal even when no buttons are pressed.
- The INTERFACE controls the radio whenever the steering wheel is turned (mostly late 80's early 90's Honda/Acura).
  - Program the INTERFACE for version #11.

When ever I program a new button the previous button does not work.

• You must program all buttons during programming. If you try to program another button, all previous button will be erased. You will have to relearn all previous buttons again.

#### Working on a new or unlisted vehicle?

We are always looking for new vehicle information. If you've successfully completed the installation on a vehicle with steering wheel controls, and the vehicle is not listed in these instructions or on our Website, contact us at techsupport@pac-audio.com so that we may add the information to the instructions.
